

Helping stroke survivors regain a sense of touch

# Sensory Rehabilitation following Stroke:

*Neuroscience Foundations, New Evidence and Application to Clinical Practice*

Presented by

**Professor Leanne Carey**

together with **Dr Brendon Haslam and Yvonne Mak-Yuen**  
*clinical leaders in SENSE Assess and SENSE Therapy*

## Workshop Details

**When:** Thursday 24<sup>th</sup> & Friday 25<sup>th</sup> October 2024

**Where:** La Trobe University  
Kingsbury Drive,  
Bundoora. 3086.  
Health Sciences 1  
Level 1, Rm 131.

**Cost:** \$820  
cost includes:  
SENSE course manual,  
certificate of course completion,  
and lunch, morning/afternoon teas

**Register here:**

<https://www.eventbrite.com.au/e/sensory-rehabilitation-following-stroke-tickets-1010204126737>

Loss of body sensations is common post-stroke with negative impact on exploration of the environment, hand function and activity participation.

In this workshop Dr Carey will present an evidence based approach to sensory rehabilitation.

### Professor Leanne Carey

BAppSc(OT), PhD, FAOTA, FOTARA

Dr Carey's research focuses on development of approaches to rehabilitation that are founded on theories of neuro-

plasticity and learning, and empirically tested for clinical and neuroanatomical outcomes using functional neuroimaging techniques. An important focus has been to translate these discoveries into clinical practice and better outcomes for people who experience stroke.
